### SDSU BARRACUDA BELTS

**FRED JR IS UNDERWAY.** We are building FRED's Debris Collection Subsystem and integrating it into a used Prindle catamaran that was donated to us. In parallel, we are building the solar-powered Navigation and Data Communication Subsystem (NDCS) and integrating it into a used Hobie catamaran that was also donated. **THANKS TIM PERRY!** When we have fully tested these subsystems, we will integrate all components, using the Prindle as the vessel platform and voila, **FRED JR. WILL BE BORN THIS QUARTER.**

Donated Prindle Catamaran

FRED JR Collection System Design

Donated Hobie Catamaran

CLEAR BLUE SEA is establishing partnerships with organizations committed to product sustainability and ocean conservancy. Some of these partnerships include companies donating a portion of their sales to Clear Blue Sea, while supporting each other on social media. Our first partnerships include the following:

Dominiqart

Arrow Electronics

DIYogi

Little Rumi

Unique Globe

SD Dive Center

Please tell your friends about [Clear Blue Sea—the Ocean](http://ClearBlueSea.org) needs more fans like you!  
**FRED would appreciate your financial support to become itself more quickly! Donate at [ClearBlueSea.org](http://ClearBlueSea.org)**
